This label for Command 3ME Herbicide is valid from February 1, 2008 until August 31, 2012, until withdrawn, canceled or suspended.

Section 24(c) State Registration

DIRECTIONS FOR USE:

For aerial application of Command 3ME on rice.

Apply prior to weed emergence during the period from 14 days pre-plant to 7 days post - plant or apply post-plant to rice at 1-2 leaf stage to provide pre-emergent and extended residual grass control. If grass is already present, include a post emergence grass herbicide with the application. Command 3ME may only be tank-mixed with one tank mix partner among the following pesticides: AIM, Bolero, Buccaneer Plus, Clincher, Cornerstone, Credit Extra, Duet, Durango, Facet, Glyphomax Plus, Glyphos Xtra, Grasp, Makaze, Mirage Plus, Mustang MAX, Newpath, Permit, Rattler, Ricestar, Stam, Super Wham, as well as Crop Oil Concentrate or Non-ionic surfactant. Only a single application of Command 3ME plus an approved glyphosate formulation is allowed per season. The following herbicides may be added to Command 3 ME + AIM for a three way tankmix: Facet, Mustang MAX, Newpath, and Superwham as well as a Crop Oil Concentrate or Non-Ionic Surfactant. The following herbicides may be added to Command 3 ME + Mustang MAX for a three way tankmix: Facet or Superwham as well as a Crop Oil Concentrate or Non-Ionic Surfactant. Another tankmix may be applied: Command 3ME + Mustang MAX + Grasp as well as a Crop Oil Concentrate or Non-Ionic Surfactant or the tankmix Command 3ME + Superwham + Permit as well as a Crop Oil Concentrate or Non-Ionic Surfactant.

Observe all buffer restrictions noted in the Application Precautions and Restrictions sections.

Partial weed control may result if levees are pulled after Command 3ME has been applied.

Additional use of labeled post-emerge herbicide applications may be required where existing grass weeds are present at the time of application.

CROP	PESTS	RATE OF APPLICATION			
		Soil Texture	Broadcast Rates Per Acre*	Pounds active ingredient per acre	Acres per Gallon
Rice	Barnyardgrass (Watergrass) (Including herbicide resistant types) Broadleaf Signalgrass Crabgrass (Large, Smooth) Panicum (Common, Fall, Texas) Sprangletop	Coarse (light) Soils: (sand, loamy sand, sandy loam)	Do not use		
		Medium Soils: (loam, silt, silt loam, sandy clay, sandy clay loam)	1.1 pts (17.1 fl oz)	0.4	7.5
		Fine (heavy) Soils: (silty clay, clay loam, silty clay loam, clay)	1.33 - 1.6 pts (21.3 - 25.6 fl oz)	0.5 - 0.6	6 - 5
		* Select lower to higher rates based on lighter to heavier soil types.

CROP SAFETY PRECAUTIONS:

Application of Command 3ME herbicide to fields which have been precision leveled with deep cuts may result in rice crop injury including stand loss. Consult with rice specialists for soil amending practices which can reduce potential for herbicide injury in precision-leveled fields.

AERIAL APPLICATION REQUIREMENTS:

Refer to: Arkansas Pesticide Use and Application Act and Regulations. Act 389 of 1975 as amended (pages 15-17).

APPLICATION PRECAUTIONS:

Caution must be taken to minimize off target drift of Command 3 ME as off-site movement of Command can cause foliar whitening or yellowing of some plants.

Do not apply Command 3ME herbicide within 1,200 feet of the areas listed below:

Towns and Housing Developments

Commercial Vegetable Production (except peppers, pumpkins, succulent peas, sweet corn, sweet potato and winter squash)

Commercial Fruit / Nut Production

Commercial Nurseries

Commercial Greenhouses

Do not make applications of Command 3 ME herbicide when spray particles may be carried by air currents to areas where sensitive crops and plants are growing, or when temperature inversions exist. Prior to application, adjacent properties must be checked, and applications within 300 feet of desirable plants must be avoided.

RESTRICTIONS:

Command 3ME may be applied to water seeded rice 14 days prior to planting or during rice pegging up to re-flooding but prior to grass emergence.

With split applications do not apply more than a total of 1.6 pt/A Command 3ME (0.6 lbs ai/A) per season.

Do not use Command 3ME herbicide for weed control in rice planted in sand, loamy sand or sandy loam soils.

Do not apply Command 3ME herbicide on rice fields in which concurrent crayfish or catfish farming is included in the cultural practices.

Do not use water containing Command 3ME residues from rice cultivation to irrigate food or feed crops, which are not registered for use with Command 3ME.

Follow State of Arkansas Facet use restrictions if more restrictive than Command 3ME.

In addition to the above statewide requirements, the following additional restriction shall apply to Poinsett County:

- a) No water diluted spray of Command 3ME herbicide shall be applied by air in an area one mile west of Highway #1 to one mile east of Highway #163 from the Craighead-Poinsett County line to the Cross-Poinsett County line.

REPLANTING INSTRUCTIONS

If initial planting of rice fails to produce a uniform stand, rice may be replanted in fields treated with Command 3ME herbicide. Do not retreat fields with a second application of Command 3ME. Do not replant treated fields with any crop at intervals that are inconsistent with the ROTATIONAL CROP GUIDELINES on this labeling.

ROTATIONAL CROP GUIDELINES

Rotate to crops as listed below, otherwise crop injury may occur.

Note: When using Command 3ME herbicide with other registered herbicides always refer to rotational restrictions and precautions on the other product's label.

ANYTIME - Cotton*, Peas, Peppers, Pumpkins, Rice, Soybeans, Tobacco

9 MONTHS - Cotton, Corn (Field, Pop, Seed, Sweet), Cucurbits, Dry Beans, Peanuts, Potatoes, Snap Beans, Sorghum, Sugar Beets, Sweet Potatoes, Tomatoes (Transplanted)

12 MONTHS - All crops

* Refer to "REQUIREMENTS FOR PLANTING TIME APPLICATIONS" and "REPLANTING INSTRUCTIONS" in the Command 3ME federal label.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA REGISTERED LABEL ARE TO BE FOLLOWED. THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.
